UN Warns over 80% of Yemeni Population Need Humanitarian Aid

07/09/2015

The Saudi war, which is continuing for the sixth month, has affected some 1.8 million people in Yemen and neighboring countries, including refugees and internally displaced people, according to the agency, RIA Novosti reported.

The blockade imposed by the Saudi-led coalition has hindered the import of food and fuel, leaving Yemeni residents requiring food, medical aid and clean drinking water.
