
US: Democrat Lawmakers Define Green New Deal Goals

07/02/2019

Democratic Rep. Alexandria Ocasio-Cortez and Senator Ed Markey laid down 10-years goal of Green New Deal which aims at net-zero greenhouse gas emissions.

U.S. Democratic House Representative [Alexandria Ocasio-Cortez](#) and Democratic Senator Ed Markey Thursday laid out the goals of a Green New Deal to achieve net-zero greenhouse gas emissions in 10 years, setting a high bar for Democrats who plan to make climate change a central issue in the 2020 presidential race.

The resolution is the first formal attempt by lawmakers to define the scale of legislation to create government-led investments in clean energy and infrastructure to transform the U.S. economy.

“The Green New Deal fully tackles the existential threat posed by climate change by presenting a comprehensive, 10-year plan that is as big as the problem it hopes to solve while creating a new era of shared prosperity,” according to a summary of the resolution released by the lawmakers Thursday.

Ocasio-Cortez said she will immediately begin to work on legislation that would “fully flesh out the projects involved in the Green New Deal.”

Republicans have already criticized the initiative, waving off any kind of proposal as heavy-handed. The Trump administration does not believe action on climate change is necessary and is focused on increasing production of oil, gas, and coal on federal and private land.

Doug Lamborn, a Republican from Colorado, said at a climate change hearing in the House Natural Resources Committee Wednesday that the policy was akin to a “Soviet five-year plan.”

The non-binding resolution outlines several goals for the United States to meet in 10 years, including meeting 100 percent of power demand from zero-emission energy sources.

It also calls for new projects to modernize U.S. transportation infrastructure, decarbonize the manufacturing and agricultural sectors, make buildings and homes more energy efficient and increase land preservation.

The Green New Deal also aims to create an economic safety net for “frontline” communities that will be affected by a radical shift away from fossil fuel use.

[@GideonResnick](#) [@AOC](#) on Green New Deal: “Even the solutions that we have considered big and bold are nowhere near the scale of the actual problem that climate change presents to us to our country, to the world.”

“We ... need to be sure that workers currently employed in fossil fuel industries have higher-wage and better jobs available to them to be able to make this transition, and a federal jobs guarantee ensures that no worker is left behind,” according to a summary of the plan.

The Green New Deal was put into the media spotlight by a youth coalition called the Sunrise Movement and Ocasio-Cortez, 29, the youngest woman to serve in Congress.

Markey, a veteran lawmaker from Massachusetts, introduced sweeping climate change legislation a decade ago, which passed in the House but stopped short in the Senate.

At least a half dozen Democratic 2020 presidential hopefuls have said they would adopt Green New Deal policies, without offering specifics.
